

BATUHAN TAŞDEMİR

Computer Engineer · Full-Stack Developer

Ankara, Türkiye · +90 507 611 05 69 · batuhanmedine2003@hotmail.com
linkedin.com/in/batuhantasdemir03 · github.com/CaptainBlc · captainblc.github.io

Computer Engineering senior at TED University with hands-on experience in C#, C++, Python, and Flutter. I build end-to-end management systems and practical full-stack tools—connecting reliable backends, clear interfaces, and maintainable architecture.

EXPERIENCE

Game Developer Intern

Jul 2025 – Aug 2025

FRANTIC GAMES

- Built modular Unity systems in C# with Scriptable Objects for scalable, decoupled gameplay data.
- Implemented AI pathfinding and state-machine logic for dynamic in-game behaviors.
- Delivered game-loop and UI/HUD features with a focus on UX polish and performance.

Software Programmer Intern

Jun 2024 – Aug 2024

INFODIF Software & IT Technologies

- Developed Python/C++ backend modules for real-time object detection and data processing.
- Built a SpaCy NER pipeline to extract and classify entities from unstructured text.
- Engineered C++ solvers (chess/sudoku) with attention to algorithmic complexity and memory use.

PROJECTS

Leta-Takip — Session & Finance Desktop App — github.com/CaptainBlc/Leta-Takip

Python/Tkinter operations panel for counseling practices: scheduling, billing, cash ledger, staff payouts, and rotating SQLite backups.

OptiLumen — Hybrid AI Image Enhancement — github.com/CaptainBlc/optilumens

TED University CMPE 491 marketing site and project surface for a hybrid AI image-enhancement system (HTML/CSS/JS).

NovaStore — Flutter Mini Catalog — github.com/CaptainBlc/NovaStoreMobil

Flutter e-commerce catalog with login, filtered product grid, detail flows, and theme-driven UI (internship capstone module).

NLP NER Tool — github.com/CaptainBlc/named_Entity

SpaCy-based named-entity recognition workflow to automate extraction and categorization from raw text corpora.

EDUCATION

B.Sc. Computer Engineering (English)

2022 – 2026 (Expected)

TED University

- 50% admission scholarship · Full English curriculum
- Coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Computer Networks

SKILLS

Languages: C#, Python, C++, Java, SQL, Dart, HTML/CSS

Frameworks & AI: .NET, Unity, Flutter, SpaCy, OpenCV, SQLite

Concepts: OOP, Design Patterns, REST APIs, Agile/Scrum, UML, RDBMS

Tools: Git, GitHub, Visual Studio, JetBrains Rider, Figma

CERTIFICATES

- Software Engineering: Implementation and Testing
- Software Engineering: Software Design and Project Management
- Software Engineering: Modeling Software Systems using UML

LANGUAGES

Turkish (Native) · English (C1–C2, professional working proficiency)
