Ankara / Turkey

https://captainblc.github.io

Computer Engineering graduate from TED University with a strong foundation in full-stack development and system architecture. Proficient in designing and sustaining reliable applications using C#, C++, and Python across data processing tools and game systems. Adept at leveraging Git, CI/CD workflows, and core software engineering principles to ensure maintainable delivery.

Experience

Software Intern

03.2026 – 04.2027

SOFTWARE PERSONA

- Contributed to collaborative, delivery-focused software engineering workflows.
- Applied strict version control and core project delivery processes in an agile environment.

Game Developer Intern

07.2025 – 08.2025

FRANTIC GAMES

- Architected modular game systems in C#/Unity, utilizing Scriptable Objects to decouple data from behavior and enhance maintainability..
- Implemented pathfinding and state-machine AI for predictable and dynamic entity control.
- Delivered end-to-end UI/HUD integrations optimized for user flow and runtime performance.

Software Programmer Intern

06.2024 – 08.2024

INFODIF YAZILIM VE BİLİŞİM TEKNOLOJİLERİ

- Developed high-performance back-end modules in Python and C++ for real-time object detection.
- Engineered a custom Named Entity Recognition (NER) pipeline using SpaCy to automate the classification of unstructured text data.
- Optimized complex logical solvers (Chess/Sudoku) in C++, focusing strictly on algorithmic complexity and memory management.

Education

Computer Engineering

2022-2026

TED University

- Bachelor of Science in Computer Engineering (100% English)
- Key Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Computer Networks.

Languages

English

C1- C2 Advanced Level
Professional Working
Proficiency

Turkish

Native

Soft Skills

- Analytical Thinking:** Result-oriented persona with a focus on problem-solving.
- Rapid Learning:** Ability to quickly adapt to new technologies and frameworks.
- Effective Communication:** Strong collaboration skills within cross-functional teams.

- Pragmatic Approach:** Focusing on delivering working, practical solutions rather than over-engineering.
- Continuous Improvement:** Actively seeking constructive feedback through code reviews to refine skills.
- Time Management:** Efficiently prioritizing tasks to meet project deadlines in fast-paced environments

Interests

- ML and AI:** Closely following developments in Generative AI and Large Language Models.
- Strategic Games:** Enhancing logical thinking through chess and complex strategy simulations.
- Open Source:** Contributing to and exploring community-driven software projects.

Certificates

- Software Engineering:** Implementation and Testing - HKUST
- Software Engineering:** Software Design and Project Management - HKUST
- Software Engineering:** Modeling Software Systems using UML - HKUST
- Software Internship of Participation :** UI/UX & Web Design, Web Development, Database and SQL, Mobile App Development – Software Persona

Projects

Session Tracking Application	Built an end-to-end Python desktop application for counseling practices handling scheduling, billing, and payouts. Designed with a local SQLite architecture for on-premises security, automated backups, and GitHub Actions for multi-platform builds.
OptiLumen – Hybrid AI Image Enhancement	Developed a hybrid AI image-enhancement system. Built the public-facing HTML/CSS/JS frontend to translate complex engineering outputs into a streamlined product narrative.
NLP-Based Named Entity Recognition (NER) Tool	Engineered an automated NLP pipeline using SpaCy to extract and categorize critical data from raw text, replacing manual workflows with rapid AI-driven processing.
Modular System Architecture & System Design (C#)	Designed a scalable Unity game architecture employing Scriptable Objects for clean data separation. Integrated advanced AI pathfinding, adhering to clean code principles to establish a bug-free system foundation.

Professional Skills

- Full- Stack Software Development:** End-to-end application design and system logic implementation.
- System Architecture & Design:** Building modular and scalable architectures using Design Patterns and UML. Agile and Scrum Methodologies.
- Database Management:** Designing relational database schemas and managing data integrity with SQL/MySQL/SQLite.
- Algorithmic Optimization:** Engineering high-performance logical solvers and optimizing complex code structures.
- AI & Data Processing:** Implementing NLP pipelines (SpaCy) and Computer Vision modules for data classification.
- Agile Methodologies:** Experience in iterative development cycles and version control via Git/GitHub.
- API Design & Integration:** Knowledge of creating and consuming RESTful services to connect frontend components with backend logic.
- Data Integrity & Normalization:** Applying RDBMS principles to ensure consistent and non-redundant data storage in application databases.
- UI/UX Implementation:** Translating business requirements into functional and user-centric desktop/game interfaces.
- Software Lifecycle Management:** Hands-on experience in the full cycle of development, from requirement analysis to testing and deployment.

Technical & Tool Assets

Back-End / AI	Coding	Database	Engineering	DevOps / Tools
- SpaCy (NLP) - OpenCV (CV) .NET Foundations - Data Structures	- C# - Python - C++ - Java - JavaScript - HTML/CSS	- SQLite - SQL,MySQL - Relational Database Design - CRUD Operations	- UML Modeling - OOP - Software Design Patterns - Agile/Scrum - Testing	- Git, - GitHub, - Github Actions - Visual Studio, - JetBrains Rider, - Figma - CI/CD
